✎ Professional Summary

Front-End Developer with strong UI/UX skills, experienced in building responsive web apps, real-time dashboards, HR & supply chain systems, and an AI-powered Jarvis-style assistant. Passionate about clean code, smooth design, and modern web technologies, with a focus on delivering user-friendly products.

💼 Experience

Software Developer   04/2024 – 08/2025
Claidas Technologies Private Limited

- Worked as a Front-End Developer, responsible for designing and developing user interfaces using HTML and CSS.
- Additionally, took on the role of Team Leader, ensuring the project was executed efficiently and delivered successfully.
- One of our major achievements was building and launching MyLinkLearn , a supply chain management website, within a month
- Also contributed to the Human Resource Management System, designing the UI/UX, including dashboards and web pages, while collaborating with my team to refine the project.

📁 Company Projects

Human Resource Management System   05/2024 – 12/2024
Role: Front End Developer

- Created responsive interfaces for all HR modules such as Attendance, Payroll, Leave, Employees, and Ticketing using HTML, CSS, JavaScript, Bootstrap, and PHP. Improved navigation flow and ensured the system was user-friendly and smooth to use.

Mylinklearn   08/2024 – 10/2024
Role: Front-End Developer

- Built module screens and responsive layouts using HTML, CSS, JavaScript, and Bootstrap. Focused on clean UI design and smooth page interactions for easier supply chain operations..

Idream Consultants   04/2025 – 05/2025
Role: Front End Developer

- Developed a clean and modern corporate website using HTML, CSS, and JavaScript. Designed the layout, service pages, and responsive structure for a professional brand experience.

📁 Personal Project

Bat Human – AI Chatbot   09/2025 – 11/2025
Role: Full Stack Developer

- Developed the Bat Human chatbot by building both the front-end interface and the back-end logic using Python, Flask, RAG (Retrieval Augmented Generation), HTML, CSS, and JavaScript. Created the chat UI, designed the message flow, and integrated RAG-based response processing to deliver smooth, intelligent, Jarvis-style conversations.

Guardian Ring – Women Safety Smart Ring   11/2024 – 03/2025

Role: Front End Developer

- Created a modern product website using HTML, CSS, and JavaScript with smooth animations and feature sections for emergency alerts, live tracking, and Bluetooth security.

Arsa Creations –Business Website ⬈   05/2025 – 10/2025

Role: Front-End Developer

- Built a responsive, visually appealing company portfolio website for Arsa Creations using modern web technologies. The site showcases their services (e.g. web development, AI integration, branding), team, client testimonials, blog, and contact section. Designed for a clean, professional brand presence while maintaining usability and responsiveness.
